2025 Darien Police Department Body Worn Camera Report

Department Overview – Darien Police

The Darien Police Department consists of thirty-six (36) sworn officers who utilize thirty-six (36) body worn cameras and (13) in-car cameras. The department fully implemented the body worn camera program in March of 2023.

Technical Issues

The Darien Police Department experienced one problem with the activation button on one camera. We sent the camera back to the vendor and it was fixed.

Review Process

Supervisors (Patrol and Investigations) periodically review their personnel's squad car and body worn camera footage. Axon Performance randomly pulls a set number of videos to be reviewed by each supervisor for their assigned subordinates. In addition, the deputy chief of operations conducts randomly selected supervisor reviews utilizing the same program. This process ensures that every officer using a body-worn camera has at least a monthly review completed. The program (Axon Performance) tracks the date reviewed, type of recording, time of the incident, officer involved, event category and comments amongst other items.

The random video review system (Axon Performance) was purchased by the Darien Police Department in 2024 to ensure that videos reviewed by supervisors are selected randomly and autonomously.
