

MINOOKA POLICE DEPARTEMNT
CHIEF JUSTIN MEYER

ANNUAL REPORT BODY CAMERAS 2025

AGENCY OVERVIEW

The Minooka Police Department consists of 24 sworn Officers. In August of 2023 our department initiated our body worn camera program utilizing Motorola V300 Body Worn Cameras. Additionally at that time we upgraded all in-car camera systems to the Motorola M500 In-Car Camera Systems. Implementation included 22 BWC's and 13 in-car camera systems. Each Officer is assigned their own body-worn camera and all patrol squads are outfitted with an in-car camera system. In 2024 our department purchased 2 additional V300 Body Worn Cameras to accommodate for new officers. Our current inventory of BWC's is 24 and In-Car Camera's is 13.

TECHNICAL ISSUES

Our department has encountered the following technical issues;

System Recovery displaying on LCD screen with symptoms of Random Rebooting/Random Power Off when docked/undocked issue with most of our BWC's. By following the manufacture's direction to clean the battery and device contacts all issues were resolved without incident and no reported loss of recordings.

Battery Pack overheating, swelling and/or splitting open - a total of six batteries all replaced by manufacture, no reported loss of recordings.

Video recording quality, image color distorted - one BWC replaced under warranty, no reported loss of recordings.

REVIEW PROCESS

The Department's BWC review process currently consists of shift supervisors conducting random reviews of 3 BWC videos monthly and report all findings to the Chief of Police.

OTHER RELEVANT INFORMATION

No other information to report.
