

Body Camera Report for the Mount Sterling, Illinois Police Department

Mount Sterling Police Department utilizes 6 Body Cameras.

Body Cameras were used by 7 officers in 2025.

Technical Issues:

In May/June of 2025, the on-site server used to store the video data of the department began to malfunction. Motorola assisted in correcting the problem. Motorola downloaded all content to preserve it during this incident, and no data is known to have been lost, however, all tags related to those videos were lost. Each officer had to review their videos recorded prior to the equipment malfunction and recategorize each recording.

Review of footage is limited to non-prohibited incidents and supervisors.
